

THANK YOU!

Dear **domOS** subscribers, thank you for your support and dedication to our project throughout its journey to successful completion! Since the beginning of September 2020, **domOS** has been a collaborative effort, uniting 10 partners from various European countries. After 42 months of dedication and hard work, we are thrilled to announce that the project is reaching its conclusion this month.

As we prepare to wrap up this remarkable venture, we are eager to share with you our efforts and the results we have achieved along the way. Join us as we reflect on our journey and celebrate the milestones we have reached together.

Final Consortium Meeting

The Final Consortium Meeting of the **domOS** project brought together the partners in November 2023, at the **HES-SO** premises in Switzerland. The meeting provided a platform for productive discussions, presentations, and shared experiences among partners.

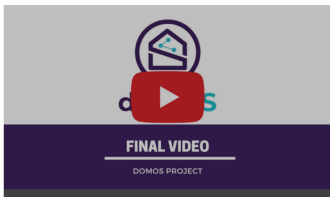

Under the guidance of the project coordinator **Dominique Gabioud**, attendees engaged in informative sessions and filmed interviews with partners for the final project video.

Final Video

The final project video presents the **domOS** partners, as they reflect on their experiences, sharing insights into the vision and approach behind the project. Discover the results of our collaborative efforts by watching the video below.

Through this video, we invite you to witness our collaborative efforts and explore the results that have emerged from our shared dedication by watching the video below.

Final Event

On the 8th of February, the **domOS project final event: "Boosting the Deployment of Smart Energy Services in Buildings: Challenges, Opportunities and Barriers"** took place online. Hosted as a webinar, this milestone gathering was co-organized by **FENIX TNT**, the dissemination and communication leader of the project, **HES-SO**, the coordinator of the project, and **BUILD UP**.

Structured across three sessions, the webinar showcased speakers from both within and outside the domOS consortium. Each session concluded with a podium discussion, moderated by the **domOS** Technical Manager, fostering engaging dialogues and idea exchanges.

DOMOS PROJECT

News & Events

We have released the **domOS** brochure, an exploration of our project's demonstrators, platforms, and overall approach. As part of our commitment to transparency and accessibility, we have crafted this brochure to provide insight into the workings of our innovative initiative. Visit the [Documents](#) page on our website for more.

Our coordinator **Dominique Gabioud** and technical manager **Matija Arh**, participated in the **Enlit_Europe** exhibition and presented **domOS** at the **EU Projects Zone**, endorsed by the European Commission. At the EU Projects Zone in Paris, projects and their representatives come together to showcase their work to the energy community.
